

New Year, New Adventures

It's 2025 and the Pedernales Cellars team is excited about some big things coming your way this year. We have added some new folks who bring plenty of wine industry experience from the Texas wine region and others as well. Jeff Ogle has joined our management team to oversee sales and marketing and Nicole West has joined our tasting room leadership team. You'll see both of them at events and in the tasting room this year! We are extremely excited about what they bring to Pedernales Cellars.

Another big development coming to the Pedernales Cellars line-up is our organic wine program. Thanks to our winemaker, Thys Smit, we have recently achieved organic certification for our winery operation. The 2024 vintage will include our first wines "Made from Organically Grown Grapes" with fruit from Desert Willow Vineyard. In the spring, we will release the Aletheia Rosé which will be the first 100% Texas wine with an organic certification! When the red wines from the 2024 vintage make it to release, they too will have the organic certification. This is another step in our commitment to sustainable practices throughout our business, but also a satisfying milestone in this journey.

Our guests who attended the blending party in January got to taste some of these amazing organic lots as part of making their own organic blends! If you missed that event, look for more opportunities to try these organic wines from the barrel as part of future cellar events!

We look forward to sharing our wines and seeing you at the winery this year so we can make memories together for 2025.

Sincerely,

David Kuhlken
